

# IMPACT Exhibition and Convention Center

IMPACT Exhibition and Convention Center has undergone major changes to ensure that it remains in forefront of exhibition and convention center management. IMPACT is focused on ensuring its 366,000 square meters of space is attentively managed to guarantee all the facilities and venues are continuously performing in optimum condition.

Sodexo plays a critical role in ensuring all events at IMPACT run smoothly and helps IMPACT understand and manage their energy consumption.

## Sodexo Managed Services at IMPACT Exhibition and Convention Center

- Energy Management Audit
- Technical Facilities Management

IMPACT with one of the largest plant and facilities equipment investments in Thailand has trusted Sodexo's technical facilities management and energy management divisions to ensure there are **no disruptions** to their daily events and functions, control their operating costs, **extend useful life** of their physical assets and **manage their energy consumption**.

IMPACT Exhibition and Convention Center is a large complex consisting of 34 meeting rooms, 14 exhibition halls and 2 grand ballrooms. It comprises parking areas for up to 20,000 cars, the 4,000-square-meter flat floored *IMPACT Arena*; the 47,000-square-meter *IMPACT Exhibition Center*; the 30,000-square-meter *IMPACT Convention Center*; and the *IMPACT Challenger* which features the world's largest column-free hall with an area of 60,000 square-meters. IMPACT also boasts one of Thailand's largest ballrooms, *Grand Jubilee Ballroom*, with a total column-free space of 3,500 square-meters with a 20-meter high ceiling.

IMPACT has hosted countless number of large-scale international and local events such as the Lions Club International Convention, Bangkok Gems and Jewelry Fair, Bangkok International Gift Fair, ATP Thailand Open Tennis, ITU Telecom Asia, THAIFEX- World of Food Asia, Disney on Ice, Herbalife Asia Pacific Extravaganza and Concerts by Eric Clapton, Billy Joel, and Black Eyed Peas.

*Sodexo was successful in identifying annual energy saving initiatives of 20.8 percent for IMPACT.*

Sodexo started a long term partnership with IMPACT by embarking on an on-site Energy Management Audit.

Sodexo spent 6 months on site identifying, measuring and analyzing major energy consumers and wastage at IMPACT. In addition to Sodexo's staff's technical experiences and capabilities; Sodexo's large investment in tools and test equipment allowed the accurate data logging and categorizing of major energy consumers.

Sodexo was successful in identifying annual energy saving initiatives of 20.8 percent for IMPACT. Sodexo's energy savings initiatives were all supported by data recorded before and after each savings initiative was implemented.

IMPACT was ecstatic at Sodexo's Energy Management Audit results which resulted in Sodexo being awarded the Technical Facilities Management Services contract.

Sodexo uses a web-based Thai Language Computerized Maintenance Management System to manage all service work requests, record asset inventory and history, manage planned maintenance tasks and schedules, and generate reports. Sodexo has over 50 staff on-site providing preventative and predictive maintenance, corrective maintenance, plant operations services, and on-going energy management monitoring and implementation of energy savings initiatives to support IMPACT's vision towards the reduction of the organization's potential impact to climate change.

*"... Though it requires long-term effort and commitment to take action on sustaining our environment, the most important point is that we are aware of the problem and the subject is part of our strategic policy and high on the company agenda"*  
 Mr Paul Kanjanapas, Managing Director at IMPACT exhibition Co. LTD.
